

LIGHTBOUND
CHOICE NETWORK

YOUR SINGLE-SOURCE SOLUTION.

LightBound eliminates the time and frustration you spend managing multiple carriers and troubleshooting your WAN.

LightBound removes the operational effort and cost of moving or adding offices. Our direct, long-term relationships with the carriers means you get options quickly, the implementation runs smoothly, and you have a single-source for ongoing issues.

TAKING CARE OF BUSINESS. MADE EASIER AND MORE EFFICIENT.

Your Wide Area Network is the heartbeat of your business. Above all, you need choices. LightBound offers 18+ carriers in our local datacenters for private connectivity between your offices and your employees. You can also choose LightBound's own dark and lit fiberoptic connections.

THE TOTAL SOLUTION

Whether you are centralizing your networks, connecting your datacenter to one of our Core DataCenters, or delivering voice service to your employees, you get a total solution. And we have more choices as your business changes.

- 18+ carriers for private circuits
- T-1, 10 Mb to 10 Gb Ethernet, fiber
- International carrier options – 10 Mb to 10 Gb
- Enterprise monitoring and device management services
- Personalized account reviews and charting
- Custom design services to any location
- Dedicated personnel and one stop for all your private connectivity needs
